

Pando Finance

Enabling trade in a
trustless economy

PROPERTY OF PANDO FINANCE

Blockchain revenue is expected to increase 46x

Problem: there are many capital inefficiencies in the blockchain ecosystem due to the difficulty in enacting trade between anonymous parties

No secondary market
for artist royalties

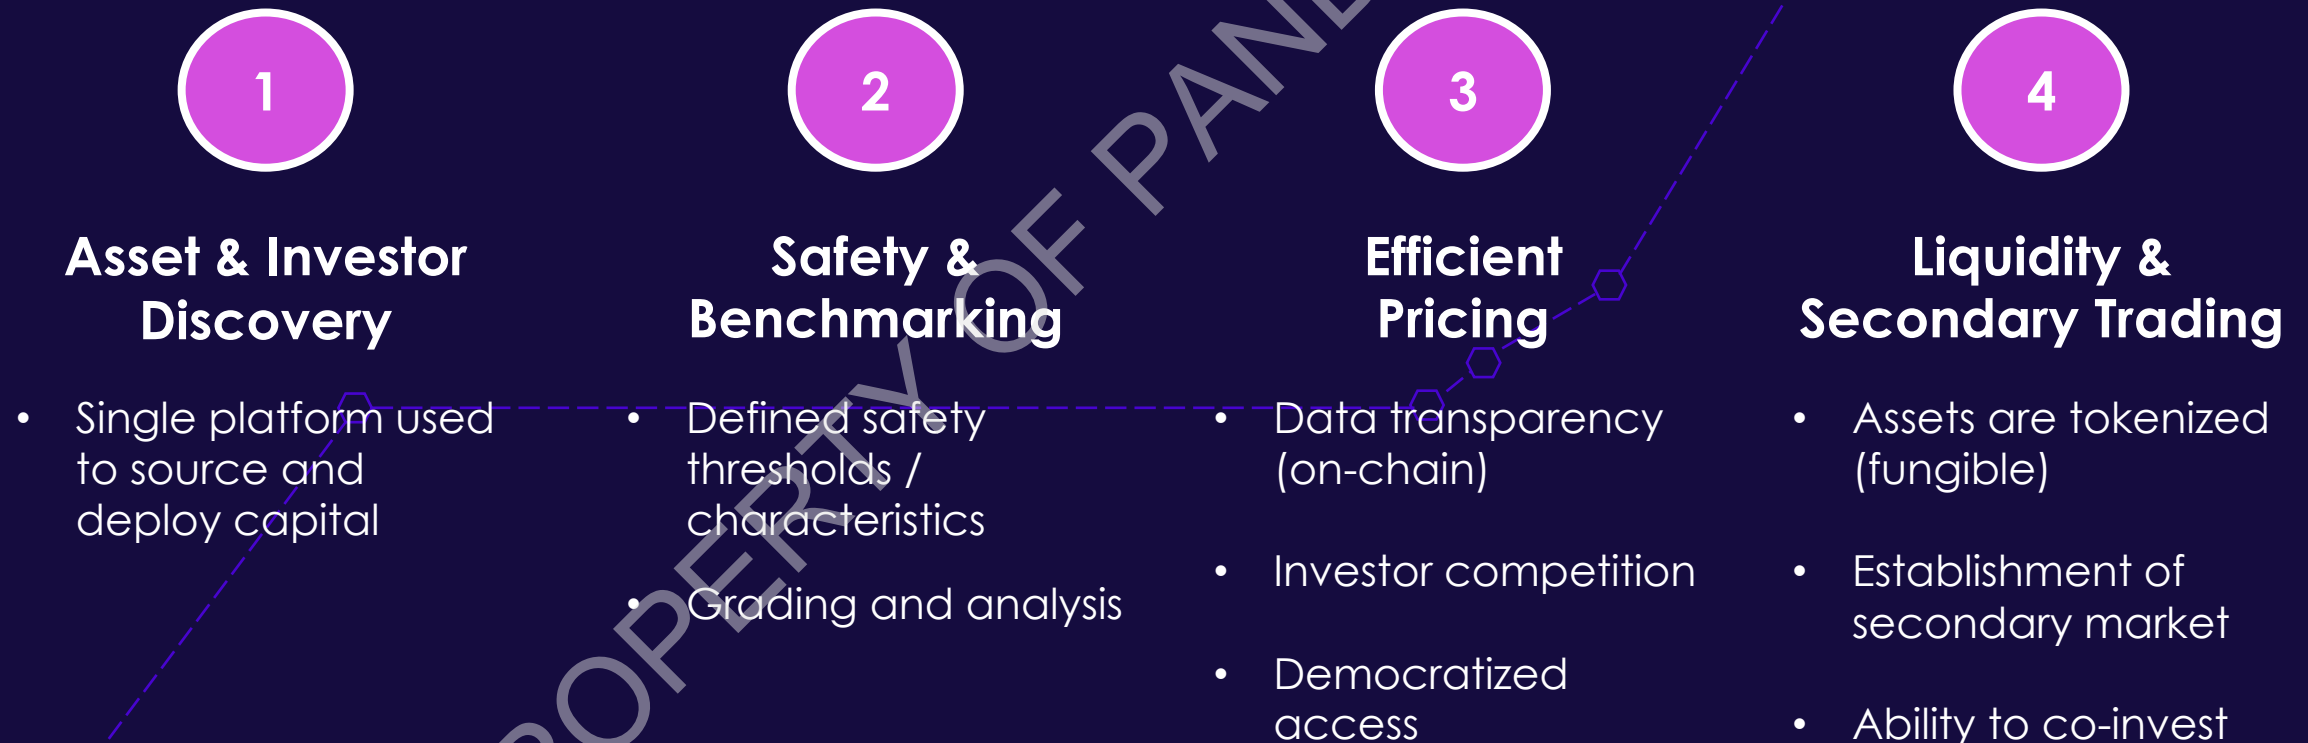

Permissionless lending
requires 100%+
collateralization

Protocols must take
equity or token dilution
to raise capital on-
chain

Solution: a smart contract revenue marketplace.

Marketplace structure facilitates anonymous trade by making future smart contract revenue tradeable

Seller Archetypes

Owners of a wallet address that receive regular smart contract revenue can trade future revenue for upfront capital

Revenue generating dApps and protocols

Nexus Mutual

Yearn.finance

Artists receiving blockchain-enabled royalty payments

NFT Art

Music

Buyer Archetypes

Expected return profile of smart contract revenue is ~15-30%, making it an appealing asset for a plethora of potential buyers

Crypto hedge
funds

Family offices

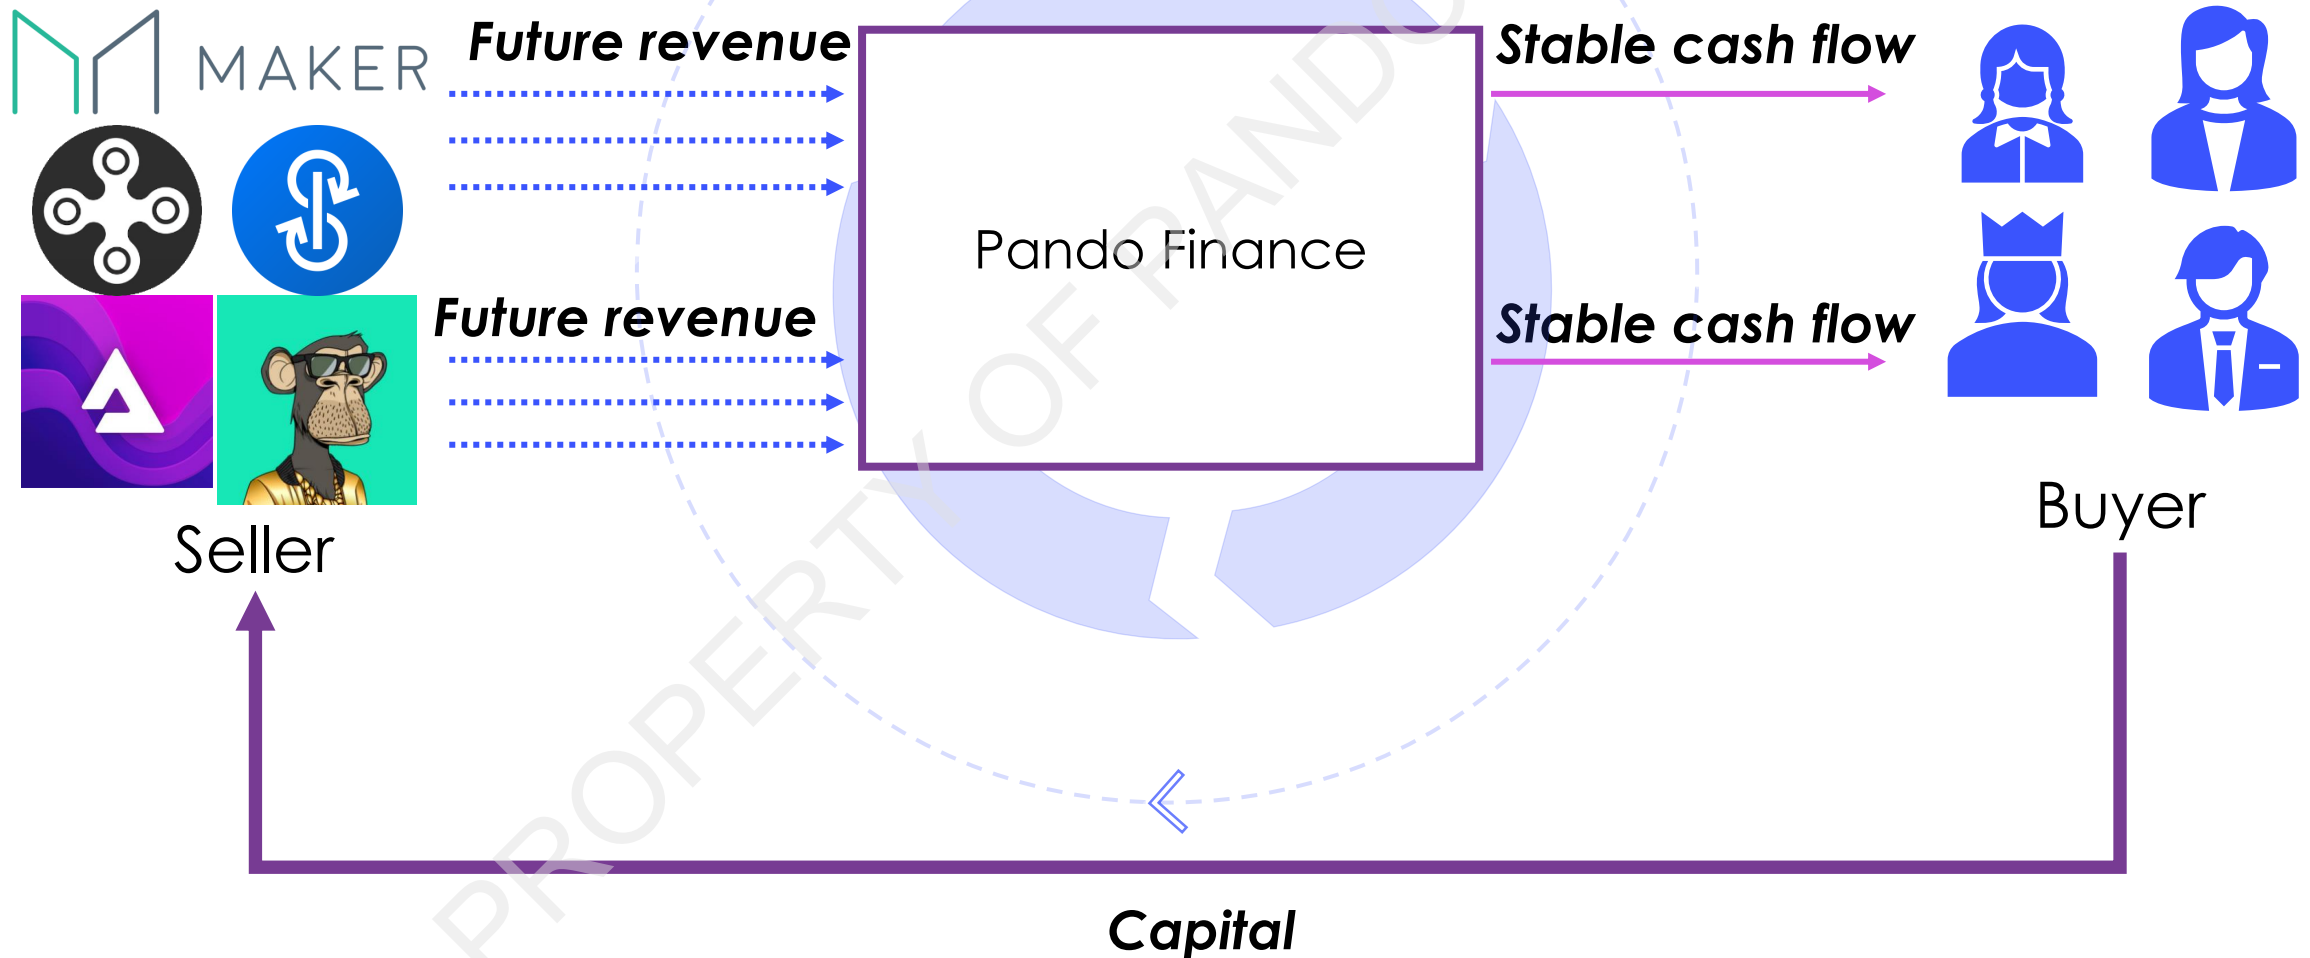

Investment
DAOs

Protocols & dApps
diversifying treasury

Business Model

5% fee charged to both marketplace participants for a total of 10% value capture

Go-to-market: focus on attracting supply

Actionable \$180M+ market today; expected to grow to ~\$5bn by 2028

Competition

Pando Finance is the only entity focused on making future revenue tradeable
